

## Bonus Points

### Deliverable 1: HTML & CSS

ID	Bonus
9	Allow modal to popup for "Need Help". The modal should contain generic information contained in any help modal
10	Use 4 distinct CSS tricks to make the UI fun and attractive to play with <ol style="list-style-type: none"><li>1. Added a preloader.</li><li>2. Animation for the whole card/content to fade up after the preloader.</li><li>3. Disabled the add to cart button and added a tooltip to hint the user to select a color first before adding to cart.</li><li>4. Added an alert after selecting the Agree button on the add to cart modal.</li></ol>

### Deliverable 2: HTML, CSS & JS

ID	Bonus
11	Allocate price with each color and allow selection of multiple prices with different colors and ensure the \$14.99 is changed to the total cost
12	Create checkout modal giving a summary of items added to cart and have a checkout button that matches the same aesthetic that closes the modal and refreshes the page
